And Students.

Once trained, adults can use BAVX with their own students / children/ clients /
patients – in their own settings.

Bal-A-Vis-X is a series of Balance / Auditory / Vision / exercises, of varied complexity, most of which are deeply rooted in rhythm. These exercises require full-body coordination and focused attention. The program utilizes sand-filled bags, racquetballs, and balance boards. It demands cooperation, promotes self-challenge, and foster peer teaching. It is school friendly and just plain fun.

Bal-A-Vis-X is for every student. It is effective for students who are labelled:-

- cognitive integration improves
- behaviour "settles"
- impulsivity decreases and attention span increases
- physical coordination improves and stress headaches diminish
- academic success improves yet requires less effort

Bal-A-Vis-X benefits students whose auditory skills are inadequate for academic success. Such students "hear" but do not attend to the precise details of

- Pronunciation * Discussions
- Verbal instructions

For these students, the rhythmic patterns of Bal-A-Vis-X create a new awareness of the nuances of sound.

Bal-A-Vis-X is for students whose visual acuity may be 20/20, yet whose vision remains deficient in

- Ocular motility (tracking)
- Binocularity (teaming)
- Visual form perception (discrimination of details)

For all students the gains in eye-hand coordination and subsequent growth in overall confidence, hence, self-esteem, are readily observable.
